

Does your organisation have a robust Audit Trail for your Training, Policies and Procedures?

When organisations make the news for the wrong reasons, it's usually because Corporate Governance has failed and there is either an absence of the necessary procedures or a failure to follow them.

WorkWize is designed not just to deliver SCORM compliant eLearning courses, but also integrate the delivery of Policies, Procedures and any other document, video or PowerPoint which requires an audit trail and sign off across the organisation.

Many issues impact good governance in today's climate. Health & safety, Allegations of Sexual Harassment, Discrimination, Fraud, a Data breach or even Modern Slavery somewhere in the Supply Chain. The consequences of an incident can be severe both to the reputation and finances of a business.

In the public autopsy that inevitably follows an allegation, the ability of the organisation to prove they have acted with integrity is often down to the quality of the audit trail that is put in place around their policies and procedures.

How can EssentialSkillz help you improve compliance with policies and procedures?

“Compliance Training” is often looked at as a simple tick box exercise and is often not given the weight it deserves. When we talk about Compliance, it’s in the context of delivering a fully closed loop system in which:

This is the real meaning of compliance – it’s ensuring the appropriate behaviours are part of an organisations cultural DNA.

Aside from the 40+ compliance focused eLearning Courses that we offer targeting mainly compliance issues, we also provide a Learning Management System to assist in delivering good governance.
